

DATALOCKER SAFECONSOLE CENTRAL MANAGEMENT

DataLocker's platform is a powerful way to manage hundreds of thousands of devices and endpoints. It lets you easily provision, secure, manage, and audit encrypted USB drives, USB ports, and encrypted virtual drives from anywhere. Available in on-prem and cloud (SaaS) rollouts, SafeConsole also has optional Premium support, and enterprise features including SSO and much more.

Enhance security for portable USB drives and workstation USB ports

Reduce time spent deploying and managing secure USB drives

Make tracking and compliance for secure USB drives simple with sophisticated auditing and reporting tools

Keep your workforce productive with easy-to-use devices and dynamic security postures

DEPLOY AS CLOUD (SAAS) OR ON-PREM*

Remotely provision, configure, manage, and audit your fleet of encrypted USB drives, while also unlocking powerful security features for DataLocker drives.

On-board McAfee® anti-malware is always on to scan files on secure USB drives, remove or quarantine malware threats, and report information back to SafeConsole.

Store and secure local or cloud data in an encrypted virtual drive.

Ensure that your workforce only uses approved USB devices to prevent malware intrusion or accidental file loss.

*Uses Windows Installer, which can work from bare metal, virtual images or any cloud, including private clouds.

SAFECONSOLE CLOUD/ON PREM FEATURES ON WINDOWS AND MAC OS

COMPLETE CENTRAL MANAGEMENT AND CONTROL FOR ADMINISTRATORS

DEVICE CONTROL FOR SECURE USB

- Password policy configuration
- Automatic inventory directory of all users and devices
- Audit trail of device actions and file movements for compliance
- Remote password reset
- Managed standalone logins on Linux or any machine
- Remotely detonate (permanently destroy) device
- Remote factory reset/disable/deny access/set-as-lost
- Set to audit mode (restrict access and disable edits)
- Remotely reassign device to new user
- Inactivity lock
- Write-protection (managed read-only)
- File restrictions (disallow/allow file extensions)
- Geofence (based on host IP)
- Custom unlock screen message
- Managed on Windows or Mac
- On Prem or Cloud deployment options

ANTI-MALWARE FOR SECURE USB

- On-Board device McAfee® anti-malware
- Automatically delete or remove malware on device
- Real-time reporting on infected files and devices

PORTBLOCKER FOR USB PORTS IN THE NETWORK

- Ensure only approved USB devices are used
- Completely lock-down USB ports at the hardware layer
- Report on unapproved device attempts
- Temporary USB device access

SAFECRYPT FOR FILES AND FOLDERS

- Virtual encrypted drive for Windows or Mac OS
- Centrally managed Virtual Encrypted Drive on desktop that allows secure storage and separation of work files and folders
- Setup as a shared Remote Network Drive - locally encrypt and sync securely with network (NAS), OneDrive, Google Drive and more.
- Keep locked drives separated from the host operating system

ADD PRO FEATURES

Add to your SafeConsole deployment.

PRO FEATURES

- Premium support tier (2 hour max response time)
- Dedicated team of support managers
- Priority support queue
- Advanced hardware replacement with RMA
- ZoneBuilder: secure auto-login and device restriction

ADD ENTERPRISE FEATURES

Includes everything in Pro, plus the following for your SafeConsole deployment.

ENTERPRISE FEATURES

- REST API access
- Single Sign On for Admins (SSO, SAML v2)
- SSO/SIEM integration
- SIEM external logging
- Kerberos SMTP server support
- Active Directory User Synchronization and Secure Active Directory User Synchronization (LDAPS)
- Dedicated Server IP addresses (Allows firewall whitelisting for outgoing traffic)
- Custom geographic server location (Meet compliance requirements)
- Unlimited user audit logs

Ready to Get Started?

Ask about a Starter Pack to create your perfect SafeConsole deployment. The starter pack contains 20 seats that can be used for any product. Additional seats may be purchased separately.
