- Ease of use - With a simple to use UI and simple provisioning, users can concentrate on working and not at setting up complex software.

- Multi Factor Authentication with Clavister EasyAccess allows password-less authentication using the Clavister OneTouch Applications.

Clavister
OneConnect

The fast way and secure way to get the most out of your NGFW

It's a simple axiom of security: the most robust solutions often fail at the weakest link in the chain: the human firewall. Bad passwords, not connecting to the VPN tunnels and other security mishaps often happen because users find the tools difficult and counter intuitive to use. After all, users are used to the simplicity of one click features in their apps and user experience, why should their security be so complicated?

That's why Clavister created OneConnect, a simple app that creates a terrific user experience allowing fast connection to resources behind your Clavister NetWall in the most secure way. For enterprise customers and hosting providers, the challenge of Virtual Private Networks for

mobile users requires an easy-to-use, centralized and flexible remote access solution as workers take their devices out of the office and into where the business is happening. Clavister OneConnect is our SSL VPN Client that offers a simple and easy to use solution for remote access using the Clavister's Next-Generation Firewalls.

Connecting securely is as easy as utilizing our built-in provisioning portal in our NGFW, downloading and installing the client and you're ready to connect. Once you've done that, you simply have an icon that you click—either on devices or mobile phones—that puts the powerful security of VPN, identity authentication and other feature plugins at your disposal to empower your security, not be hassled with complicated logins and deployments. With support for Microsoft Windows and Apple macOS there's support for a wide range of devices.

Challenges we solve

Clavister OneConnect provides a solution to add secure connection to corporate networks.

Secure access
Securing access to corporate networks, protecting the identities of users, and ensuring that the users are who they claim to be is vital for any organization. While supporting the increasing of remote users while at the same time reducing costs are challenges many organizations face today.

Integrations
By integrating Clavister OneConnect with Clavister EasyAccess you can easily add strong multi-factor authentication and single sign on to the Clavister EasyAccess portal to simplify login user experience.
