

AP440, AP840 & AP840E

Cloud managed WiFi-6 access points

Next-gen performance with WiFi-6

The Datto Networking WiFi-6 access points deliver advanced wireless performance to our MSP-focused AP lineup. The AP440, AP840, and AP840E are WiFi-6 enabled and Hotspot 2.0/Passpoint® ready (in upcoming software releases), unlocking access to High Efficiency (HE) capabilities that deliver increased capacity, throughput and power with multi-gig speed. The AP840 and AP840E access points offer four data streams that enhance network density and allow more users per AP, which lowers costs for businesses and provides a better overall WiFi experience for users.

Auto-optimized with expanded coverage

Datto WiFi-6 APs leverage a high-powered Front End Module (FEM), or an integrated circuit with amplifiers, to boost power transmission and receiving sensitivity for longer range and coverage than a typical radio. This enables MSPs to serve larger businesses and venues both indoors and outdoors. Datto WiFi-6 APs continue to bring the value of auto-optimization and self-healing mesh networking to MSPs so you can spend less time managing user disconnections and more time growing your business.

Secure MSP networking

Protected networks are productive networks, which is why Datto WiFi-6 APs include a dedicated scanning radio for advanced security and insights. Bolster your WiFi security offering and advanced encryption methods. Pair this with WPA3 authentication, presence analytics, and automation, and you have a simplified WiFi security solution, built exclusively for MSPs.

Born in the cloud

WiFi begins in the cloud. For Datto Networking, it starts in the Datto Network Manager, where MSPs can add access points with pre-configured settings directly to their network. With configurations set and stored in the same portal used to manage all Datto devices, an MSP can deploy WiFi networks in minutes. Simple, rapid deployment born in the cloud.

MSP aligned

Datto Networking has one customer, the managed services provider. Because of this, we focus all of our efforts on aligning with the MSP business model. From simple deployments and management to native RMM and PSA integrations to friendly pricing, Datto Networking was purpose-built for MSPs.

Managed networking services...the Datto way

We believe in the value of great products and an unwavering commitment to 24x7x365 customer service and support. Each access point ships with a lifetime warranty and is backed by an advanced replacement program. If you have an issue with your device, we will ship you a new one before you send your damaged device back.
