

All-in-one AI platform

nexus.ai enables business teams to work at their full potential. Chat with top AI models and automate tasks by building custom no-code AI agents - all in a single AI platform.

Key capabilities

AI Chat

Get all top AI models in one chat.

- Switch between models.
- Compare models results side-by-side.
- Use deep reasoning.
- Search in web, your files and tools.

Agents

Automate repetitive tasks.

- Build custom no-code AI agents.
- Connect agents with your tools and automate work.
- Start fast with templates.

Agent workflows

Create automated workflows.

Turn manual work into automated workflows that execute across your existing systems and tools.

Security

No training on your data | SSO and access controls | Hosted in Europe | GDPR-compliant
SOC 2 Type 1 and ISO 27001-certified

Key benefits

Accessible to all teams

Challenge

AI tools are either powerful but complex OR simple but limited.

Solution

AI Agents require no coding. Marketing, Sales, Recruitment/HR build powerful AI helpers in minutes with no tech knowledge.

Cost and time savings

Challenge

Each team uses their preferred AI provider; costs skyrocket.

Solution

All the AI models you need in one platform. Full visibility with real-time tracking, budget caps, and cost allocation by team or project.

Security and compliance

Challenge

Employees share sensitive info with AI. AI trains on your data.

Solution

No training on your data. SSO and access controls. Hosting in Europe. GDPR-compliant, SOC 2 Type 1 and ISO 27001-certified.

Productivity hub

Challenge

Teams waste time on manual tasks that can be automated with AI.

Solution

Agents and Workflows automate boring tasks for Marketing, Sales, Recruitment/HR, and more

No scattered tools

Challenge

Different teams need specific AI tools to meet their goals. Orgs have 5+ AI providers.

Solution

All AI services & models in one platform, with Agents, Workflows, Integrations, and collaboration built-in.

Keep your data safe while teams use AI freely

Guardrails

Filter inputs and outputs to align with company policy across whole organisation teams and tools.

Full AI observability

Monitor performance and track queries with detailed logs.

ISO 27001 certified

Your data is protected by globally recognized security standards, backed by proactive risk management and continuously verified through regular audits.

RBAC

Set granular permission. Track, modify, or revoke permissions in real-time.

SOC 2 Type 1 attested

Audited to give you confidence that sensitive data is protected and managed according to strict enterprise standards.

Web platform

An easy-to-navigate platform with a **complete UI for team and user management, observability tools, and security controls.**

Mobile app

Project memory and customized Assistants wherever you go – all on **mobile**. Perfect for quick notes and on-the-go productivity.

4 ways to access nexos.ai

Plug-and-play API

An API key that can be generated for individual users or entire teams, enabling **seamless integration with existing systems.**

Browser extension

Research, summarize, write, ask questions, get context-aware AI answers based on company knowledge **directly in the browser.**

Features

For all teams

AI chat and model comparison

Work with top AI models, compare results side-by-side.

SSO

Simple authentication with Google, Microsoft. Reduce IT overhead while keeping access secure and centralized.

Secure web search

Let LLMs browse the web safely through the Workspace.

Integrations

Connect your internal knowledge and company tools straight from the Workspace, securely.

and more

Projects

Upload files, knowledge, and data once. AI responds with your context in mind, always. Eliminate cold starting AI chats and get straight into work – no need to share files and context again.

Smart model routing

Automatically picks AI model that's fastest, cheapest, or most accurate for the task.

File generation

Upload your raw data (or just paste text into AI chat) → get a file → download it.

Features

For all teams

Coming-soon

Agents

Build custom no-code AI helpers that automate routine tasks, for any use case, for any team: marketing, sales, HR, and more.

Agents templates

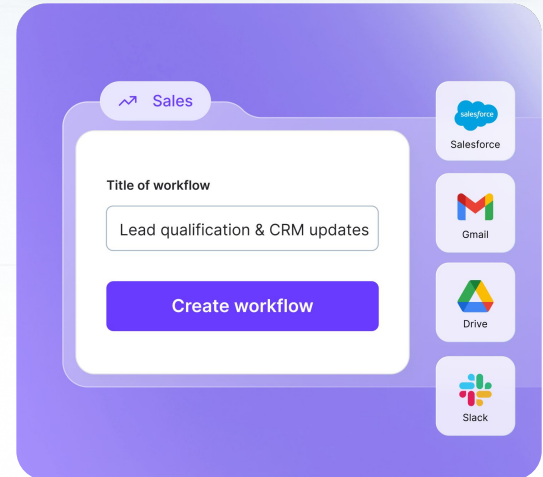

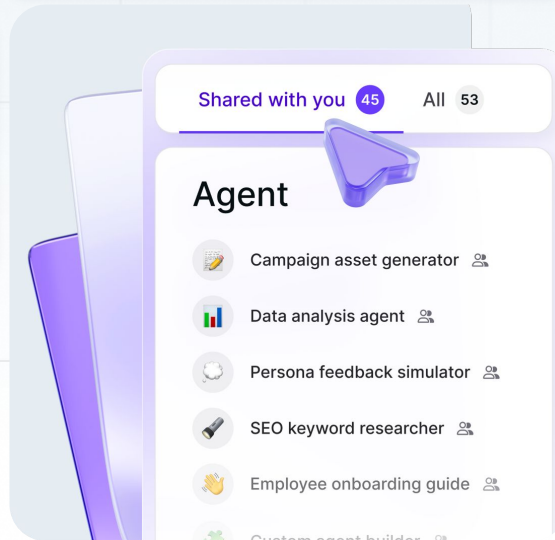

Start fast by using expert-built agents templates, add your adjustments.

Agent workflows

Helps teams automate complex, multi-step tasks with AI agents that plan, execute, and complete work across your tools and systems. It saves time, reduces errors, and scales productivity while keeping teams in control.

Deep Research

Brings comprehensive AI answers, cited research reports in minutes - based on web search, your context, files, and connected work tools.

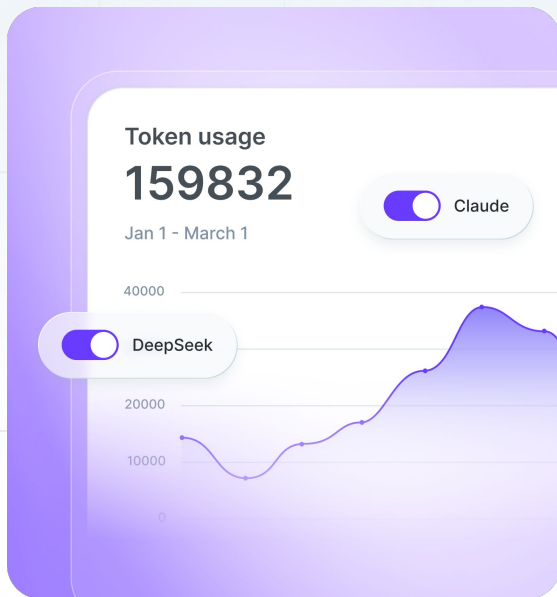

Features

For tech leads

Observability

Set budgets, track costs. Gain full transparency across every model interaction: track prompts, outputs, file activity, and API calls with unified logs and traces.

Claude-model (by Anthropic)

ChatGPT-model (by Openai)

DeepSeek (Selfhosted)

Management

Assign models, set permissions, and track usage by team or user.

Why business teams choose nexos.ai

Payhawk

Fast & unified for team-wide AI adoption

"Teams were exploring AI independently: great for innovation, but terrible for coordination, compliance, and budget. We needed a centralized AI platform that maintained security and let all teams benefit from AI at the same time."

Boyko Karadzhov
Co-Founder and CTO
Payhawk

+98%

Data accuracy rate with AI

+75%

Active user adoption rate

+40%

Reduced overall processing costs

Model-agnostic & tailored to devs

"We needed an AI platform that evolved rapidly to keep up with new LLM models. With nexos.ai, we doubled our AI output and slashed costs, all with clarity and agility."

Juras Juršėnas
COO
Oxylabs

+80%

Onboarding rate reached in 30 days

3x

Speed in AI project development

+20%

Drop in operational costs

Why business teams choose nexos.ai

Entire AI stack in one place

"nexos.ai helped us scale our no-code AI web builder from start to finish. It saved us the equivalent of two yearly salaries in development cost for a custom gateway: nexos.ai did it all."

Dainius Kavoliūnas
Head of Product
Hostinger Horizons

30%

Saved in developer hiring costs

6+

Months of development saved

Integrating AI into the core of e-commerce

"With nexos.ai, we transformed our e-commerce operations almost overnight. What would have taken us three years and millions of euros to accomplish manually, we achieved in just six weeks at a fraction of the cost."

Romas Strabeika
CIO and Head of IT
PHH Group

99.8%

Cost reduction on AI product processing

4.5M

Product descriptions refined with AI in 6 weeks
